

**Extrusion,
Workstations
And, Conveyors**

AAP **AUTOMATION**

An **OTC** INDUSTRIAL TECHNOLOGIES Company

YOUR PARTNER IN ADVANCED

AUTOMATION SOLUTIONS

WHO WE ARE

AAP Automation focuses on delivering custom extrusion based solutions to clients. We can start with a list of requirements to create a finished product, we can finish a napkin sketch, or build to print. AAP can supply third party items like polycarbonate, mesh, standard and specialty countertops. Want a conveyor with a control system added on? We work with our partners to supply a full system, wired, programmed, and tested so you can start running. AAP does full concept and design in Solidworks 3D CAD software to make sure the customer gets exactly what they want and expect.

Products:

- Workstations
- Flow Racks
- Carts
- Machine Guarding
- Pallet Conveyors
- Chain Conveyors

Services:
